

Advances in Polar Science

Contents

Vol.26 No.4 (End of Volume 26) December 2015

Articles

- Summer distribution of marine mammals encountered along transects between South Africa and Antarctica during 2007–2012 in relation to hydrological features 265
Claude R. Joiris, Grant R.W. Humphries & Alain De Broyer
- The various substrates of *Usnea aurantiaco-atra* and its algal sources in the Fildes Peninsula, Antarctica ... 274
CAO Shunan, ZHENG Hongyuan, LIU Chuanpeng, TIAN Huimin, ZHOU Qiming & ZHANG Fang
- Major hotspots detected along the Scotia Ridge in autumn for southern right whales *Eubalaena australis*, Antarctic fur seals *Arctocephalus gazella* and Antarctic prions *Pachyptila desolata* 282
Claude R. Joiris, Grant R. W. Humphries, Diederik D’Hert, René-Marie Lafontaine, Henri Robert & Roseline C. Beudels-Jamar
- Assessment and application of electromagnetic induction method to measure Arctic sea ice thickness 292
GUO Jingxue, WANG Huajun & SUN Bo

Letters

- Methodological approach to the isolation of functionally active proteins from the tissues of marine hydrobionts: an example of *Adamussium colbecki* 299
Nataliia Raksha, Dmytro Gladun, Oleksii Savchuk & Lydmila Ostapchenko
- A new method of measuring optical turbulence of atmospheric surface layer at Antarctic Taishan Station with ultrasonic anemometer 305
WU Xiaoqing, TIAN Qiguo, JIANG Peng, CHAI Bo, QING Chun, CAI Jun, JIN Xinmiao & ZHOU Hongyan
