

# Advances in Polar Science

## Contents

Vol.26 No.2 June 2015

---

### Reviews

- Recent Russian remote sensing investigations in Antarctica within the framework of scientific traverses ..... 113  
Sergey V. Popov
- Ecological controls on biogeochemical fluxes in the western Antarctic Peninsula studied with an inverse foodweb model ..... 122  
Hugh W. Ducklow, S. C. Doney & S. F. Sailley

### Articles

- A mobile polar atmospheric parameter measurement system: II. First atmospheric turbulence observation at Antarctic Taishan Station ..... 140  
TIAN Qiguo, JIANG Peng, WU Xiaoqing, JIN Xinmiao, LU Shan, JI Tuo, CHAI Bo, ZHANG Shaohua & ZHOU Hongyan
- Effects of UV radiation on the RNA/DNA ratio of Copepods from Antarctica and Chile ..... 147  
Paulo F. Lagos, M. Jesús Valdés & Karen Manríquez
- Long-term study of at-sea distribution of seabirds and marine mammals in the Scotia Sea, Antarctica ..... 158  
José Luis Orgeira, Mariela del Carmen Alderete, Yohana Gisell Jiménez & Juan Cruz González
- Model simulations of the annual cycle of the landfast ice thickness in the East Siberian Sea ..... 168  
YANG Yu, Matti Leppäranta, LI Zhijun, Bin Cheng, ZHAI Mengxi & Denis Demchev

### Trend

- Advancing the understanding of variations of Arctic sea ice optical and thermal behaviors through an international research and mobility project ..... 179  
Marcel Nicolaus, Caixin Wang, Sebastian Gerland, LI Na, LI Zhijun, Bin Cheng, Don K. Perovich, Mats A. Granskog, SHI Liqiong, LEI Ruibo, LI Qun & LU Peng
